

Muhammad Mehboob

QA Engineer | Manual & API Testing | Playwright · Postman · Jira

Lahore, Pakistan • Open to Remote • +923355976655 • muhammadmehboobceo@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented QA Engineer with 2 years of hands-on experience in manual testing, API testing, and test design for web applications. Proven track record of identifying critical defects before production — having reported 100+ bugs across multiple projects with a 95% acceptance rate from development teams. Skilled in Postman, Playwright, Jira, and test documentation. Currently pursuing ADP at University of Education, Lahore. Open to remote opportunities with US, UK, and Australian teams.

PROFESSIONAL EXPERIENCE

QA Engineer — Manual & API Testing | Confidential Client (NDA) | 2022 – 2024 · 2 Years

Working with a private software company under NDA. Full details available upon request.

- Designed and executed 500+ manual test cases covering functional, regression, smoke, and edge case scenarios across web applications
- Reported 100+ bugs in Jira with detailed reproduction steps, severity ratings, environment details, and supporting screenshots — achieving a 95% developer acceptance rate
- Performed API testing using Postman — validated endpoints, request/response cycles, authentication flows, status codes, and data integrity across REST APIs
- Built automated regression test suites using Playwright reducing manual regression time by 40%
- Maintained structured test documentation in Excel and Google Sheets — test plans, test cases, traceability matrices, and bug reports
- Participated in Agile/Scrum ceremonies — sprint planning, daily standups, and retrospectives — ensuring QA was integrated into every development cycle
- Collaborated directly with developers to reproduce defects, verify fixes, and validate releases before deployment
- Identified and reported 12 critical production-blocking bugs preventing major release failures

TECHNICAL SKILLS

- Manual Testing
- API Testing (Postman)
- Playwright (Automation)
- Bug Reporting & Tracking
- Test Case Design
- Regression Testing
- Jira (Bug Management)
- SDLC & STLC
- Agile / Scrum
- Python (Basic)
- JavaScript (Basic)
- SQL (Basic)
- GitHub
- Excel & Google Sheets
- Web Application Testing
- REST API Testing

EDUCATION

Associate Degree Programme (ADP) — Computer Science | University of Education, Lahore | 2024 – 2026

- Relevant coursework: Software Engineering, Database Management, Programming (Python, JavaScript)
- Active focus on software quality assurance, test automation, and agile development practices

KEY ACHIEVEMENTS

- 100+ bugs reported across projects with 95% acceptance rate from development teams
- 12 critical production-blocking bugs identified preventing major release failures
- 500+ manual test cases designed and executed across web and API layers
- 40% reduction in regression testing time through Playwright automation
- Maintained zero critical defect escape to production across all managed releases

TOOLS & TECHNOLOGIES

Testing: Playwright · Postman · Manual Testing · REST API Testing **Management:** Jira · GitHub · Excel · Google Sheets

Languages: Python · JavaScript · SQL (basic proficiency) **Methodology:** Agile · Scrum · SDLC · STLC
